

BASIC SEQUENCE OF USE FOR ENDOSTAR VISION

In very wide canals, you may need to use the EV3, EV4 file.

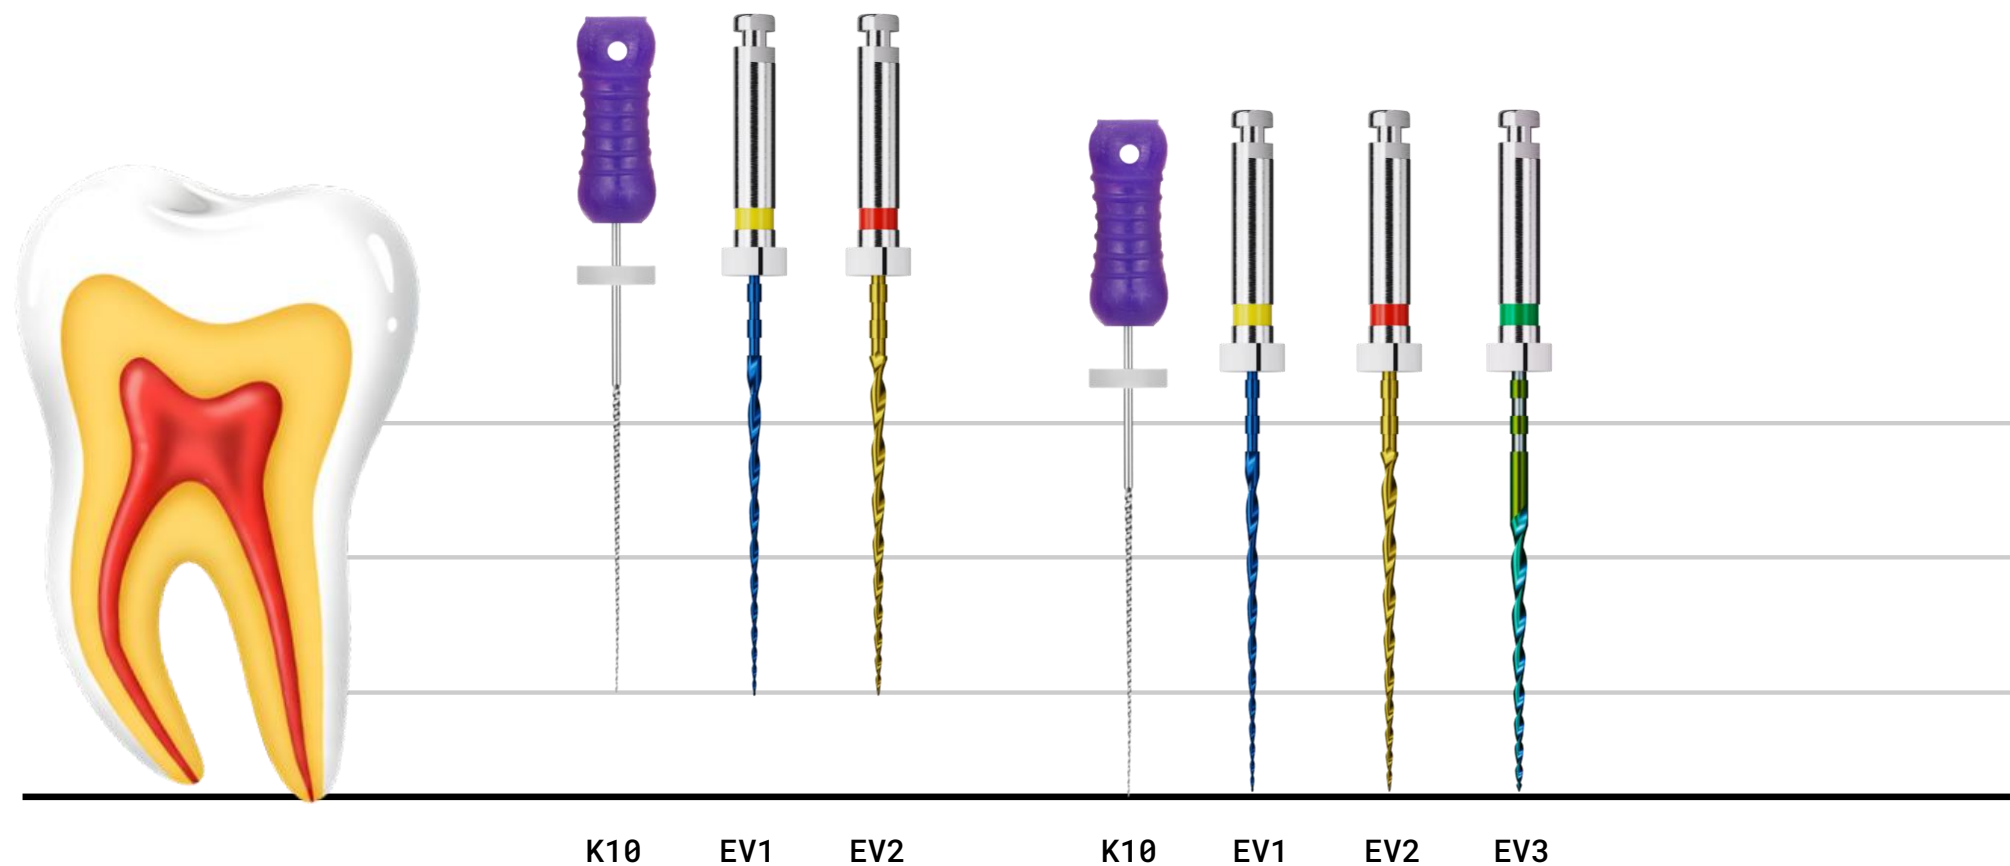

SEQUENCE FOR NARROW AND MEDIUM-SIZED, MODERATELY CURVED CANALS

(MB and ML canals in mandibular molars, buccal canals in maxillary molars, etc.)

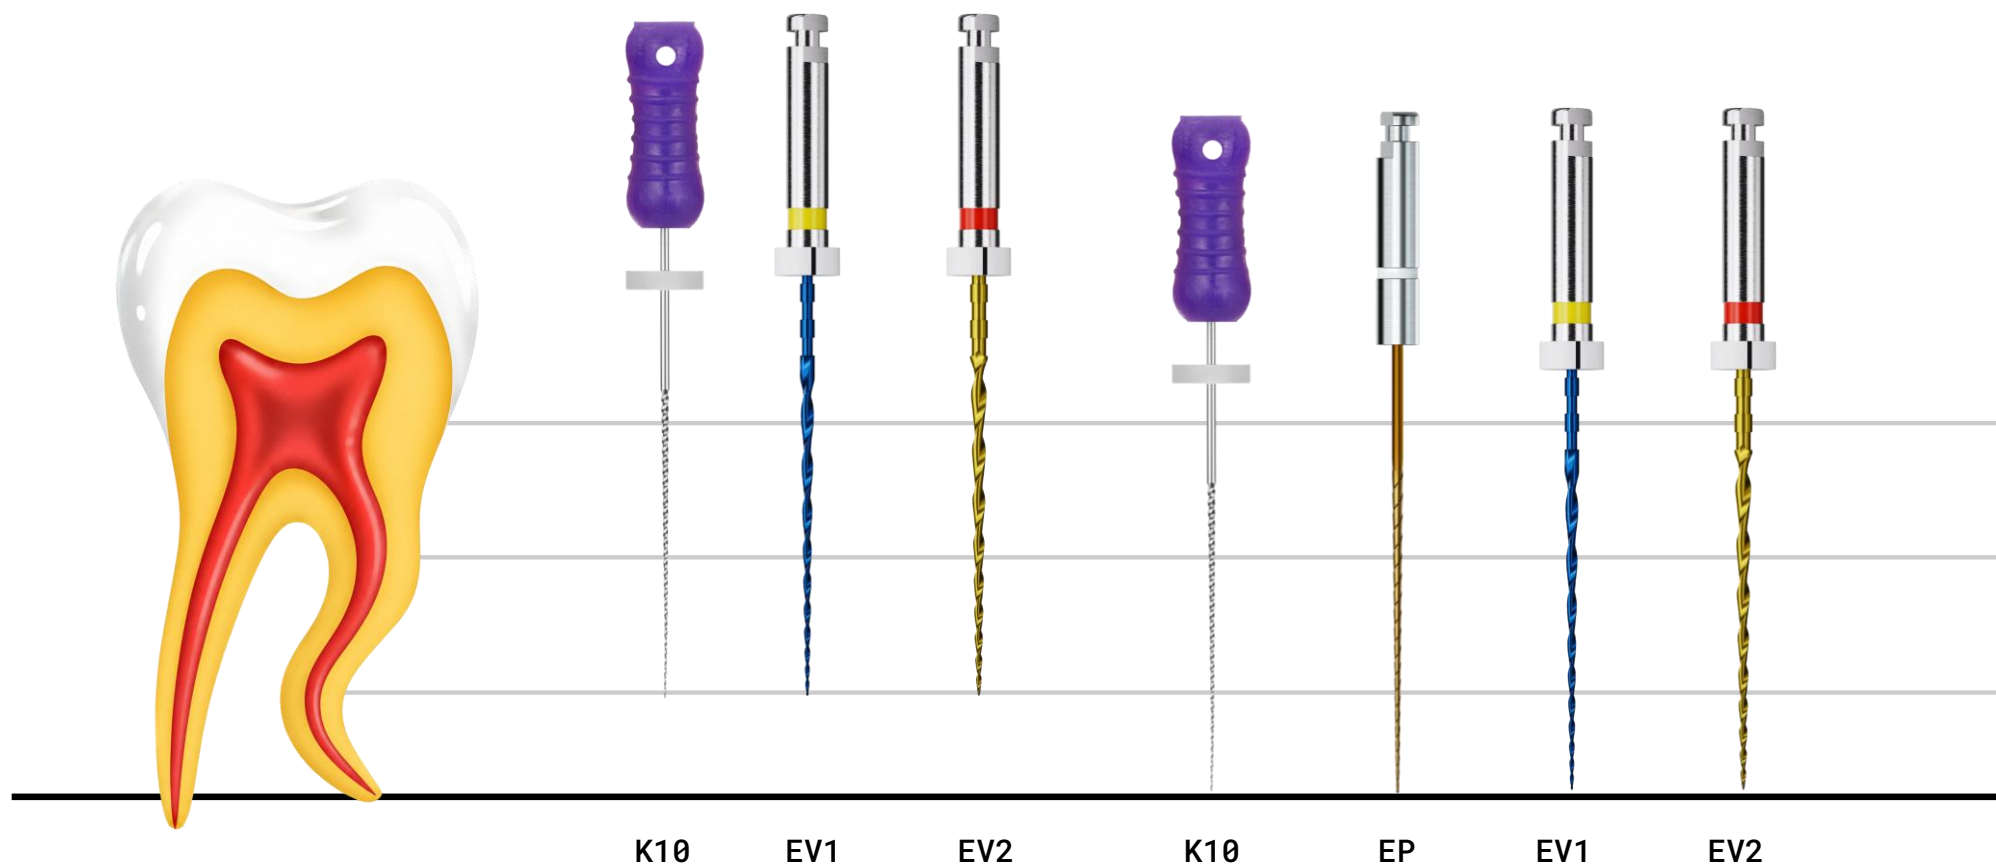

SEQUENCE FOR WIDE CANALS

(distal canals in mandibular molars, palatal canals in maxillary molars, etc.)

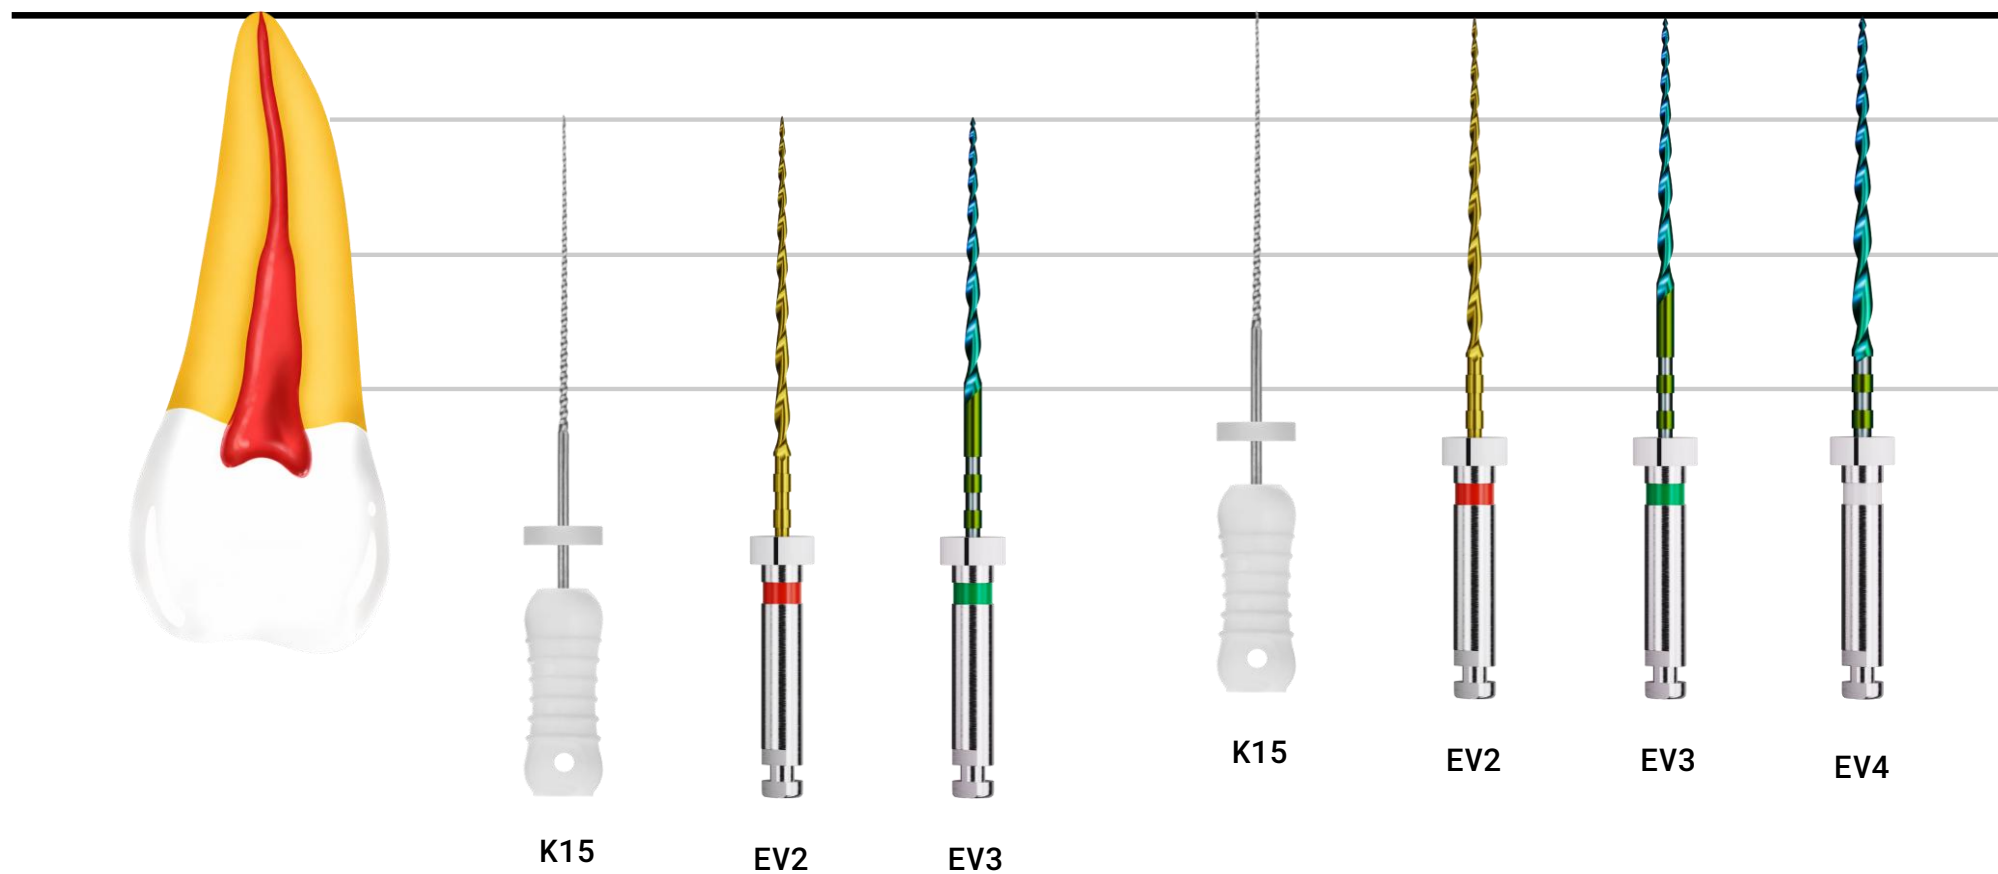

SEQUENCE FOR DIFFICULT CANALS

(very narrow, severely curved, S-shaped canals)

SEQUENCE FOR VERY LARGE CANALS

(maxillary central incisors, canines, single-canal premolars, etc.)

In very wide canals, you may need to use the EV4 file.
